RE: NRC Tritium Exit Signs

AIW-Alton (Alton Iron Works) purchased the property in Windsor, CT in 1977 and occupied the premises since that date. During the year 2003, we replaced all the exit signs in the building with new LED signs. The old signs did not have any markings identifying the use of Tritium (H3). The previous signs were all battery backups with incandescent bulbs. There are only 6 signs in the building. The signs were installed by a licensed electrician.

Sincerely,

Valmiki J. Hoffberg
President
