Attn: Document Control Desk  
Washington D.C. 20555

Subject: **Docket Nos. 50-361 and 50-362  
Amendments 217 to License NFP-10 and  
209 to License NFP-15  
LOVS Relay Replacement  
San Onofre Nuclear Generating Station, Units 2 and 3**

Reference: Letter from N. Kalyanam (NRC) to R. M. Rosenblum (SCE),  
dated March 25, 2008, Subject: "San Onofre Nuclear  
Generating Station, Units 2 and 3 - Issuance of Amendments  
Re: Revise TS SR 3.3.7.3.B, "Loss of Voltage Function," for  
Loss of Voltage Signal Relay Replacement

Dear Sir or Madam:

The NRC approved a change to the San Onofre Nuclear Generating Station (SONGS) Technical Specifications with the issuance of License Amendment 217 for SONGS Unit 2 and License Amendment 209 for SONGS Unit 3 (Referenced). These amendments were effective as of the date of their issuance with the requirement that they be implemented in the next refueling outage or unit outage of sufficient duration, whichever occurred first.

Southern California Edison (SCE) hereby requests that the implementation period for Amendment 217 to License NFP-10 be revised to no later than the Unit 2 Cycle 16 refueling outage. SCE also requests that the implementation period for Amendment 209 to License NFP-15 be revised to no later than the Unit 3 Cycle 16 refueling outage. These outages are currently scheduled to begin in late September of 2009 for Unit 2, and October of 2010 for Unit 3.

If you have any questions or require any additional information, please contact Ms. Linda T. Conklin at (949) 368-9443.

Sincerely,

A handwritten signature in black ink, appearing to read "L. Conklin", is centered on the page.
