James Mullauer
USNRC, Materials Licensing Branch
Region III
2443 Warrenville Rd.
Lisle, IL 60532

Dear Mr. Mullaur:

This letter is in regards to the medical byproducts license being requested by MIA of St. Charles County (d/b/a Clinical PET of St. Charles County). I am aware the facility has designated me as Radiation Safety Officer on their license application.

I am currently RSO on the following licenses using radioactive materials for nuclear medicine studies:

Callaway Community Hospital
Fulton, MO
USNRC Lic. 24-32566-01

Colby Medical & Surgical center
Colby, KS
Kansas Lic. 19-B612-01

Both of these facilities have relatively small nuclear medicine programs. I will be visiting the facility at least quarterly for several hours to perform a review of the program. Additionally, I will have opportunity to visit due to other medical physics business in the vicinity.

On average, I expect to spend approximately two(2) hours per month engaged in Radiation Safety issues at this facility.

Should you have any questions, please call at 314-275-8224.

Sincerely,

Walter J. Kopecky, Ph.D.

Memo To: Radiation Safety Officer

From: Chief Financial Officer

Subject: Delegation of Authority

You, Walter J. Kopecky, Ph.D., have been appointed Radiation Safety Officer and are responsible for ensuring the safe use of radiation. You are responsible for managing the Radiation Protection Program; identifying radiation protection problems; initiating, recommending, or providing corrective actions; verifying implementation of corrective actions; stopping unsafe activities; and ensuring compliance with regulations. You are hereby delegated the authority necessary to meet those responsibilities, including prohibiting the use of byproduct material by employees who do not meet the necessary requirements and shutting down operations where justified to maintain radiation safety. You are required to notify management if staff does not cooperate and does not address radiation safety issues. In addition, you are free to raise issues with the Nuclear Regulatory Commission at any time. It is estimated that you will spend approximately , on average, two (2) hours per week conducting radiation protection activities applicable to this facility.

Signature of Management Representative — Date: 3/11/09

I accept the above responsibilities,

Walter J. Kopecky — Signature of Radiation Safety Officer — Date: 3/31/09

cc: Affected department heads
