**Subject:** OC Mid Cycle package Update for IP 71003

Oyster Creek's Mid Cycle package shows IP 71003 as a proposed MC 2515 App-C inspection, during OC's October 2008 refueling outage.

However, RPS Report 22 lists two (2) different IP 71003 inspections, as follows:

2008 Oct 27-31, Outage License Renewal Commitments Inspection [2 inspectors, 1 week]

2009 March 9-13 & 23-27, Non-outage License Renewal Commitments Inspection [Team, 2 weeks]

Because Oyster Creek enters the period of extended operations on April 9, 2009, the non-outage portion of IP 71003 [2-week Team insp] will need to be performed prior to the completion of the ROP-9 End of Cycle process.

Therefore, I recommend that the Mid Cycle package be revised to CLEARLY show the two different IP 71003 App-C Inspections, as scheduled in RPS.

Thanks  
John Richmond
