

"Focus on the resource or ecosystem...." [page A-37]

"Use natural boundaries... [page A-37]

"Address resource or ecosystem sustainability....." [page A-37]

"Traditionally, environmental impact assessment has considered air quality, water resources, wildlife, and human communities as separate entities for analysis. This separation of resources has obscured many cumulative effects. Recognition of the interconnectedness of land, water, and human resources has driven many federal and state agencies to undertake ecosystem or watershed approaches to environmental protection....." [page A-37]
