Excellent perspective. If we don't need a Quick Look letter, then maybe there is no need for a 1 Week Look-ahead. The Look-ahead was initially discussed as part of issuing a Quick Look letter.

I don't see how this is within our process. We don't do look aheads for other plants coming out of outages?? And we are always very careful on licensee schedules for outages, as we do not publicly discuss, so how can we say ahead of time they will complete an outage and restart?

We may need (want) to do a 1-week Look-ahead note for OC Restart, coming out of their refuel outage, regarding our drywell structural integrity inspections. OC startup was scheduled for Nov 11, and they are currently 17-hours behind on critical path. Purpose of the Look-ahead would be to inform NRC internal stakeholders of our assessment of AmerGen's actions to evaluate structural integrity of the primary containment.

I'll provide a few sentences next Monday or early Tuesday (Nov 3 or 4), on current inspection results.
