SUBJECT: TERMINATION OF YOUR NRC RADIOACTIVE MATERIALS LICENSE

Dear Mr. Henderson:

In the NRC FORM 314, Certificate of Disposition of Materials (with attachments), dated February 12, 2009, you requested that we terminate your NRC radioactive material license, License Number 48-26074-01 (expiration date of July 31, 2015). The subject license authorized use/storage of portable moisture/density gauges at your facilities located at 74 Algana Court, ST. Peters, Missouri, and at 960 West River Center Drive, Comstock Park, Michigan, as well as at your temporary job sites. The NRC staff has reviewed the information provided in that Certificate of Disposition, and we have concluded that no leaking sealed source were ever possessed by you, based on routine leak test data (copies of the most recent data provided with the termination request). Further we conclude, based on the information provided, that all licensable radioactive material has been removed from the two referenced facilities and transferred to and received by another license you possess, which authorizes the possession and use of the make and model of gauges transferred.

Based on these conclusion, no further remediation or actions with respect to NRC regulated material is required for License Number 48-26074-01 and your facilities located at 74 Algana Court, ST. Peters, Missouri, and at 960 West River Center Drive, Comstock Park, Michigan, meet NRC criteria for release for un- restricted use and termination of NRC License Number 48-26074-01. Accordingly, an amendment is enclosed, terminating your NRC License Number 48-26074-01, as requested.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

M. A. Henderson
