or Report No(s).

Name of Licensee: ABB Incorporated

Name of Participant(s):

Heath Downey, MACTEC contractor working as radiation safety officer for ABB's CE Windsor site (207) 828-3505; Craig Hrabal, NRC Headquarters (303) 492-3208; Jim Schmidt, NRC Region 1, (610) 337-5276

Subject: Request for Additional Information: Details Regarding Controlled Excavation at CE Windsor Site.

(NOTE: This will be used as the Documents Title in ADAMS)

A phone conversation was held relative to the specific methodology that ABB intended to use (and has used in the past) regarding excavation of materials as outlined in section 10.2.1 of Revision 1 to the CE Windsor Decommissioning Plan (DP) dated December 2008. The general description included in the Revised DP originated from licensee's answer to a request for additional information as part of the review of the original version of the DP on 3/26/2004 (ML041200209) which was accepted by the NRC staff at the time. As part of Craig's Hrabal's review of a TAR (ML090921105), he was interested in a more detailed description as to how the licensee was going to control the excavation of materials during the proposed decommissioning process to ensure that the possession limit for excavated materials was not inadvertently exceeded. Heath Downey provided this description as part of this telephone conversation. Mr. Downey agreed to provide this additional detail in writing so that it could be part of documented licensee correspondence that would support the TAR response being provided by Mr. Hrabal.

Action Required: ABB provide the written response described in the telephone conversation documented above. Enter this telephone conversation into ADAMS.
