MAY 01 2009

Steven D. Struck
Radiation Safety Officer
University of Missouri – St. Louis
1 University Boulevard (102 PTB)
St. Louis, MO 63121-4400

Dear Mr. Struck:

Enclosed is Amendment No. 25 amending your NRC Material License No. 24-00513-38 in accordance with your request dated February 10, 2009, requesting the NRC approve the release of certain laboratories, designated as R-109, R-201, R-411, R-417, R-435, R-439, and R-466 (collectively, the "Facility"), for unrestricted use, and delete the Facility from your license. The Facility located at 8001 Natural Bridge Road, St. Louis, Missouri. Based on our review of the documentation you submitted in support of the request, we have determined that you have satisfactorily demonstrated that the Facility does not contain residual radiological contamination in excess of NRC release limits. As a result, the facility can be released for unrestricted use.

The NRC staff prepared an Environmental Assessment (EA) and Finding of No Significant Impact (FONSI) regarding your proposed amendment to release the Creve Coeur site facility for unrestricted use. An announcement was made in the Federal Register dated April 30, 2009, related to the EA and FONSI.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room). Please review the enclosed document carefully and be sure that you understand all conditions. If you have any questions regarding our review or this amendment, do not hesitate to contact me at (630) 829-9870.

Sincerely,

A handwritten signature in black ink, appearing to read "Peter J. Lee".
