

UNITED STATES OF AMERICA
NUCLEAR REGULATORY COMMISSION

BEFORE THE SECRETARY

In the Matter of
Tennessee Valley Authority
Bellefonte Nuclear Plant Units 1 and 2
Dockets No. 50-438 and 50-439

DECLARATION OF STANDING

Under penalty of perjury, William F. Reynolds declares as follows:

1. My name is William F. Reynolds and I am a member of the Blue Ridge Environmental Defense League.
2. I live at 3529 Dell Trail, Chattanooga, TN 37411.
3. My home lies within 50 miles of the site in Jackson County Alabama where Tennessee Valley Authority has partially constructed two nuclear power plants and for which the U.S. Nuclear Regulatory Commission has reinstated two construction permits.
4. The Nuclear Regulatory Commission issued its final environmental statement for these reactors in 1974. During the last 35 years, conditions have changed including hydrology, ecology, population, waste management, costs and the need for power.
5. Based on historical experience with nuclear reactors to date, I believe that these facilities are inherently dangerous. The reactor design Tennessee Valley Authority began to construct at this site has never been completed anywhere in the United States. The construction of these nuclear reactors so close to my home could pose a grave risk to my health and safety. In particular, I am concerned that if an accident involving atmospheric release of radiological material were to occur, I could be killed or become very ill.
6. Therefore, I have authorized Blue Ridge Environmental Defense League to represent my interests in this proceeding as to whether good cause exists for the reinstatement of the construction permits to the Tennessee Valley Authority.

DECLARATION OF STANDING

Under penalty of perjury, I Garry L. Morgan declare as follows:

1. My name is Garry L. Morgan and I am a member of the Blue Ridge Environmental Defense League.
2. I live at 130 Rome St., Scottsboro, Alabama, 35769.
3. My home lies within 4.5 miles of the site in Jackson County Alabama where the Tennessee Valley Authority has partially constructed two nuclear power plants and for which the U.S. Nuclear Regulatory Commission has reinstated two construction permits.
4. The Nuclear Regulatory Commission issued its final environmental statement for these reactors in 1974. During the last 35 years, conditions have changed including hydrology, ecology, meteorology, population, nuclear waste management, costs and the need for power.
5. Based on historical experience with nuclear reactors to date, I believe that these facilities are inherently dangerous. The reactor design the Tennessee Valley Authority began to construct at this site has never been completed anywhere in the United States. The construction of these nuclear reactors so close to my home could pose a grave risk to my health and safety.
