RE: Irigaray-Christensen Operations, Permit No. 478; TFN 5 2/022

Dear Mr. Hardgrove:

I am about to restart my reviews of the 2006-2007 and 2007-2008 Annual Reports for Permit No. 478 and well as the review of the Christensen Ranch Restoration Report submitted on April 8, 2008, and assigned Temporary Filing Number (TFN) 5 2/022.

In an attempt to review the great amount of data associated with these Reports, I plan to place as much data as possible into a Geographic Information System (GIS) file system. This work is in line with a Department of Environmental Quality program for a GIS-oriented Information System now underway.

I am requesting digital copies of the maps that were provided last year as part of the 2007-2008 Annual Report. I understand that these maps are in AutoCad format which would suite my needs. I have scanned the previous year's reports, but would prefer to work from the AutoCad files as it takes somewhat less work and accuracy is better than the scanned maps. Either .dxf or .dwg files would work, but AutoCad can also-export shapefiles which would be ideal.

I also request the spreadsheets used to construct the tables in the Christensen Ranch Wellfield Restoration Report. I was previously provided digital copies of these table, but the files provided were in .PDF format which are essentially images only and cannot be loaded into a spreadsheet as an Excel file.

Please feel free to call if you have any questions.

Sincerely,

Glenn Mooney
Senior Geologist
