Re: Amendment to NRC Radioactive Materials License #21-02037-03, Bell Memorial Hospital in Ishpeming, Michigan

Dear Sir or Madam:

We wish to amend the above referenced radioactive materials license to reflect the following changes:

1. In response to your request for our facility to specify a possession limit for iodine-131 in 10 CFR 35.300, we wish to have our possession limit set at one curie for iodine-131. We believe this is sufficient to remove the new Condition No. 15 from our license which limited our possession limit to less than ten curies.
2. We request that a correction to our license be made. The zip code for our hospital is incorrectly listed as 49489. The correct zip code is 49849.

We hope this information is sufficient to grant our request for amendment. If you have any questions please contact Steve Hill, Nuclear Medicine Department, at (906) 486-4431.

Sincerely,  
Bell Memorial Hospital  
  
Michael Altmann M.D.  
Radiation Safety Officer
