RE: Highland Uranium Project, Update to Excursion at Monitor Well IM-8,
Permit to Mine No. 603

Dear Mr. Spackman:

On April 16, 2009 Power Resources, Inc. d/b/a Cameco Resources (CR) provided notification that Monitor Well IM-8 was on excursion status with two of the three parameters (chloride and alkalinity) exceeding the approved UCLs which define an excursion. Results from May 12, 2009 show the well is off excursion. Sampling indicates that the actions taken to date have been successful.

If you have questions, please call me at (307) 358-6541, Ext. 462

Sincerely,

A handwritten signature in black ink, appearing to read "K. Wenzel".

Krista Wenzel
Manager, Environment, Health and Safety
