SUBJECT: 2009 Steam Generator Tube Converted Data

Palisades Nuclear Plant
Docket 50-255
License No. DPR-20

Dear Sir or Madam:

Enclosed with this letter is an optical disc containing the 2009 Palisades Nuclear Plant (PNP) steam generator "B" (SG B) tube 72-107 eddy current data in Zetec EddyNet format. The conversion from ANSER was performed using EddyNet "conversion spooler."

The optical disc contains the SG eddy current data for:

SG B 72-107 Bobbin inspection 2007
SG B 72-107 Bobbin inspection 2009
SG B 72-107 +Pt 3-Coil initial inspection 2009
SG B 72-107 +Pt 3-Coil inspection post in situ 2009

Channels 1 and 2 of the 2009 converted data are extra channels that are labeled as N/A. These are channels that are included in the Omni tester configuration that are not needed for analysis. They are not stripped out during the conversion to EddyNet. Data channels start with channel 3.

A separate optical disc has been provided to the NRC PNP Project Manager.

The data on the optical disc is considered non-public information.

Summary of Commitments

This letter identifies no new commitments and no revisions to existing commitments.
