Subject: NRC renewal application for License No. 29-00244-02  
Mail Control no.: 143597

Dear Mr. Thompson:

This letter is in response to your e-mail regarding Schering Corporation's renewal application. In particular you have asked if we are incinerating byproduct materials as a means of disposal and if we need the incineration authorization. You have also requested to provide the model numbers and manufacturers of our Ni-63 sealed sources.

1. Schering Corporation does not incinerate byproduct materials on site thereby we no longer require the authorization to incinerate.
2. The following is the information you have requested about the Ni-63 sealed sources in our electron capture detectors:

Source Model No.	Manufacturer
NER-004P	Agilent Technologies

If you have any questions or require any additional information please contact me at (908)740-4622.

Very truly yours,

Moji Mashaashae  
Radiation Safety Officer
