NRC, FEMA TO HOLD PUBLIC MEETINGS ON JUNE 2 IN KING OF PRUSSIA, PA., ON PROPOSAL TO AMEND EMERGENCY PREPAREDNESS REQUIREMENTS

Staff from the U.S. Nuclear Regulatory Commission (NRC) and the Federal Emergency Management Agency (FEMA) will conduct a pair of public meetings on Tuesday, June 2 in King of Prussia (Montgomery County), Pa., to provide information on a proposed agency rule that would change emergency preparedness requirements for operating nuclear power plants, for any that might be licensed and built in the future, and for research and test reactors.

The meetings are scheduled for 2 to 4:30 p.m. and 7 to 9:30 p.m. at the Park Ridge Hotel and Conference Center, 480 N. Gulph Road in King of Prussia. NRC representatives will discuss changes included in the proposed rule and in the supporting emergency preparedness program guidance. FEMA representatives will present information on a proposed supplement to a joint FEMA/NRC document that addresses criteria for preparing and evaluating emergency response plans for nuclear power plants, and on a draft revision of the Radiological Emergency Preparedness Program Manual.

Developed over many years and with public inputs, the proposed NRC rule would limit the duties of a plant's on-site emergency responders to ensure they are not overburdened during an emergency event, and require specific provisions to protect them and other plant personnel during a hostile action event. In addition, the proposed rule would require all nuclear power plants to incorporate hostile action security scenarios in their drills and exercises, which at present focus primarily on nuclear safety-related scenarios. New requirements for back-up measures for alerting and notification systems are also included in the proposed rule.

Attendees are encouraged to read the documents associated with the proposed rule on <http://www.regulations.gov> (Docket Nos. NRC-2008-0122 and FEMA-2008-0022) prior to the meeting. The proposed rule was published in the Federal Register on May 18. It can be viewed at: <http://edocket.access.gpo.gov/2009/pdf/E9-10947.pdf>.

Comments on the proposed rule must be submitted by Aug. 3. Citizens can submit comments over the federal e-Rulemaking Portal at <http://www.regulations.gov>; by e-mail to Rulemaking.Comments@nrc.gov; or by mail to Secretary, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555-0001, ATTN: Rulemakings and Adjudications Staff; or by fax to 301-492-3466.

Interested members of the public unable to attend the meetings may participate via toll-free teleconference or webconferencing. For details, call Annette Stang at 1-800-368-5642 or send an e-mail to: Emergencypreparedness.resource@nrc.gov no later than May 28.
