General Comment

Due to the time required for State and Local agencies to review, digest and comment on the REP Program changes, the comment period should be extended from 75 days to at least 150 days. This will allow for more comprehensive review and significantly better quality comments which is what FEMA and the NRC are looking for to improve the overall quality of the REP program. The stated goals at the start of this process was to eliminate preconditioning, have realistic scenarios and avoid negative training. Allowing for a detailed review and comment period will help meet these goals.
