comments: Re: Foreign Nuclear Waste Being Disposed of in the U.S.

Dear U.S. NRC,

U.S. District Judge Ted Stewart ruled recently that EnergySolutions Inc. has been given the privilege of dumping radioactive, toxic nuclear waste from the country of Italy at this company's facility in Utah. After this mammoth amount of 20,000 tons of waste has been shipped through the ports of Charleston and New Orleans, it will then be processed in Tennessee. The remaining 1,600 tons will be shipped to and disposed of in Utah.

What are we doing taking in nuclear waste which lasts for thousands of years into our county from other countries, when we cannot even find a place to dispose of our own waste; i.e., the recent cancellation of nuclear waste disposal plans at Yucca Mountain, Nevada?

For EnergySolutions Inc. to claim that our representatives the Congress have no right to keep the U.S. from becoming the dumping ground for the world's nuclear waste is extremely frightening to put it mildly. Are we to become no different than the toxic and polluted ship-breaking yards on the shores of Bangladesh? Only in this case, the outcome is infinitely worse, when the well-known dangers of nuclear radioactive waste are considered.

If not for us, please consider the impact of this decision on our future generations. Please do everything in your power to stop this horrible situation from becoming a nightmarish reality.

Respectfully,

Stephen and Judy Slane
