Dave,

Attached please find the subject request for additional information (RAI). A draft of this RAI was provided to you on May 21, 2009. Based on the email dated May 29, 2009 from Roger Wink, this RAI did not need any clarifications.

The schedule we have established for review of your application assumes technically correct and complete responses within 30 days of receipt of RAIs. For any RAIs that cannot be answered within 30 days, it is expected that a schedule date for submitting your technically correct and complete response will be provided to the staff within the 30 day period so that the staff can assess how this information will impact the review schedule.

Thanks.

Docket No. 52-037

SRP Section: 08.02 - Offsite Power System

Application Section: 8.2

QUESTIONS for Electrical Engineering Branch (EEB)

08.02-1

FSAR Section 8.2.1.1, page 8-9, states that "The frequency and the type of studies to be performed, as well as the required transmission system operation criteria are outlined in the agreements and are in accordance with FERC reliability standards, MISO and AmerenUE standards, regional practices and the Callaway Plant Transmission Owner Agreement." Provide clarification why the NERC Planning Standards are not included here as criteria. Confirm whether NERC Reliability standards (NUC-001-1) for nuclear plant interface coordination are applicable.
