Hi Earl,

I've attached a copy of the Corrective & Preventive Action (CAPA) form that I issued on March 9<sup>th</sup> in accordance with our procedures.

As I mentioned on the phone this morning, my intent is to prepare an internal training on 10 CFR 71 as one of the corrective actions for the CAPA.

In addition to this I've had an informal audit performed according to NUREG/CR-6314 'Quality Assurance Inspections for Shipping and Storage Containers' to ensure that all of the qa program requirements are being met.

In our QA Program submittal I included a matrix that linked all the requirements of part 71 to our Quality System.

Thanks,

Mike
