Eric,

Calvert Cliff COL (CCC) documentation can be found from our public web site at:

http://adamswebsearch2.nrc.gov/idmws/doccontent.dll?library=PU_ADAMS^PBNTAD01&ID=081020309

If you have any problems to get them, let Henry know.

I am not involving in the CCC review, but I heard that the contracting process has been delayed. It is a bit awkward for you to start the work before contracting, but the situation is the same for PNNL.

I heard that the task order which is quite similar to that of STP was already approved internally and will initiate a RFP process soon. You may ask Henry to get a copy of task order and to discuss the scope and budget in advance if you need.

If you and your team are not available during the proposed audit dates, you may proposed alternate date, or you can skip site visit and do the audit by documentation or via a teleconference.

Dear Hosung,

I'm a little confused about Henry's request below. We don't have a Task Order for Calvert Cliffs yet do we? I haven't looked to see if the FSAR is on the web. How should we (USGS/Texas A&M) proceed?

Nebiyu, Jill, Gene & Eric:

Please check your schedules for the week of 23 June and the month of July for potential safety audit dates and let me know as soon as possible. In the meantime, please prepare "information need" statements for your FSAR sections. I will consolidate your statements and forward them to the John Rycyna (Safety PM) for OGC approval.

I will be on leave 28 June to 13 July. Thus, the week of 23 June would be great if your schedules permit.

Henry
