In accordance with the requirements of 10 CFR 50, 51, and 54, PPL Susquehanna, LLC (PPL) requested the renewal of the operating licenses for the Susquehanna Steam Electric Station (SSES) Units 1 and 2 in Reference 1.

The License Renewal Rule, 10 CFR 54.21(b), requires that each year following submittal of a license renewal application (LRA), and at least 3 months before scheduled completion of the NRC review, an amendment to the renewal application must be submitted that identifies any change to the current licensing basis (CLB) of the facility that materially affects the content of the LRA.

In accordance with this requirement, PPL performed a review of CLB changes since the submittal of Reference 2, to determine whether any sections of the LRA were affected by these changes.

The PPL review did not identify any CLB changes that materially affect the information in the LRA. Therefore, an amendment to the LRA is not necessary.
