MEMORANDUM TO: FILE

SUBJECT: NRC INSPECTION REPORT NO. 09-25410-01E/98-01,
LEVENGER COMPANY

During a recent IMPEP, the reviewer determined that the inspection record for my inspection at the subject licensee was not in the docket file nor available in the docket file in NMSS. I inspected the licensee on September 15, 1998. I met with Mr. Charles R. Delbaugh and Ms. Cheryl Gibbs during the inspection. The licensee is authorized to distribute timepieces with radioluminous dials and hands that contain tritium. I observed the storage location of the watches, discussed the receipt, inventory and distribution of the watches, and reviewed records of receipts and distributions. I identified no violations during the inspection and issued a clear NRC Form 591 at the conclusion of the inspection.
