

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

June 17, 2009

Mr. Mark J. Ajluni
Manager, Nuclear Licensing
40 Inverness Center Parkway
PO Box 1295
Birmingham, Alabama 35201

SUBJECT: FARLEY NUCLEAR PLANT, UNIT NOS. 1 AND 2- DAM SAFETY AND
OPERATION INSPECTION REPORT

Dear Mr. Ajluni:

Enclosed is a copy of the Dam Safety Inspection Report prepared by the Federal Energy Regulatory Commission (FERC) for the U.S. Nuclear Regulatory Commission. The enclosure contains the results of an inspection on April 9, 2009, of the Category I Cooling Water Storage Pond at the Joseph M. Farley Nuclear Plant, Unit Nos. 1 and 2. During this inspection there were no conditions found that should adversely affect the immediate safety, permanence, and operational reliability of the Category I Cooling Water Storage Pond or present a threat to the safety of the public or the nuclear facility. A review was made of the project record and instrumentation data that have been prepared since the last inspection conducted on July 10, 2007. The storage pond appeared to be appropriately operated and maintained.

At FERC's request, the enclosure is not being made publicly available since it contains critical energy infrastructure information.

Sincerely,

A handwritten signature in cursive script that reads "Robert E. Martin".

Robert E. Martin, Senior Project Manager
Plant Licensing Branch II-1
Division of Operating Reactor Licensing
Office of Nuclear Reactor Regulation

Docket No. 50-348, 50-364

Enclosure: As stated

cc w/o enclosure: Distribution via Listserv

**The enclosure transmitted herewith
contains Security-Related information.
When separated from enclosure, this
document is decontrolled.**
