610-337-5075

Subject: Pending need for Renewal/Termination of License.

(NOTE: This will be used as the
Documents Title in ADAMS)

09:45 I was informed by the receptionist that the medical director was no longer Lawrence Gelber, M.D. since he was no longer with the practice. The receptionist was also of the opinion that nuclear studies were no longer performed at the facility. She would have the office manager contact me after her meeting ends.

11:25 I spoke with the office manager, Georgia Denman. She stated that the office stopped performing nuclear medicine studies in March 2009. The physicist is supposed to come in and properly close up the rooms. Once the license is terminated, the practice will continue without a nuclear medicine component. I requested that a letter be drafted and sent in to the NRC so that the termination process could be started. The letter should reference the license number and that the licensee is in the process of performing close-out surveys and decommissioning the license for termination. Ms. Denman indicated that she would see to it that the letter was submitted to the NRC.
