Dear NRC Staff,

I would like to take a moment to voice support for the Eagle Rock Enrichment Facility proposed by AREVA. I attended the hearing held in Idaho Falls on June 4, 2009. I was not surprised by the rhetoric from members of the Snake River Alliance. Most of the comments from that organization have little to do with the issue at hand, which is studying the environmental impacts of the proposed project. I welcome a thorough review of the potential environmental impacts because, in the end, facts and science will be on the side of AREVA. AREVA understands it must operate in a safe and environmentally friendly manner because of the scrutiny a project like this will attract.

As a member of the eastern Idaho community I welcome the jobs and economic impact a facility like would bring to the area. I urge the NRC to conduct a thorough EIS, specifically looking at the socio-economic impacts, as well as the impacts on water and air quality. I am confident the result will be approval of the license, which will be good for eastern Idaho and the country.
