Subject: public comment on Areva facility

To whom it may concern,

I am writing to express my concerns on the opening of the Areva uranium enrichment facility in Idaho.

First of all, since all Idahoans taxes will support this facility, I beleive there should be hearings accross the state. People in northern and eastern Idaho deserve their say.

Secondly, I am most concerned with the problem of storing depleted uranium over the next million years. Creating depleted uranium means creating a problem that will outlast the human race.

Next, Areva has dumped into the English Channel each year to the point of polluting the seas all the way to the Artic Circle. I do not trust them to avoid doing the same in Idaho.

Lastly, I oppose uranium enrichment because of its potential for making nuclear warheads. I oppose nuclear weapons accross the board.

Thank you for your consideration,

Matthew Yocum
