Subject: AREVA APPLICATION

I wish to testify in favor of the enrichment facility that AREVA proposes to build in Idaho Falls. I have been a resident of Idaho Falls since 1978. We raised our family here. I have a strong opinion regarding our nation's energy needs. I also recognize the need for green energy. We are basically putting together an energy policy to make up for past neglect by the citizens, elected officials, and the private sector. It is important that we make pragmatic decisions that are science based, not politically based. Any decision will have some element of risk. In my opinion nuclear energy is a green energy unless you view it through a political paradigm, or your historical mission is anti-nuclear. Energy is a main support system of our economy and our way, and our security. The rest of the progressive nations regard nuclear as an option while protecting our environment. We cannot afford to close the door on this option. The wind and the sun should be a part of our solution. Do not however let the wind blow away our future or the sun blind our vision. I support AREVA's application before the NRC sent from my Verizon Wireless BlackBerry
