Re: Background Archaeological Research, Proposed General Electric Uranium Enrichment
Project, New Hanover County, North Carolina

Dear Dr. Ridge:

It was a pleasure to meet with you and Daniel O'Rourke regarding the Section 106 compliance aspects of the above cited project. As requested by Mr. O'Rourke, I have printed out site forms from his list and copied a recent archaeological report for his cultural context research.

An invoice for the copying charges for these materials and the copies made during your visit is enclosed. As we discussed, archaeological site locations are protected information in accordance with North Carolina General Statute 70-18 and should not be made available to the public.

You should receive an official letter from the State Historic Preservation Officer shortly concerning compliance with Section 106 of the National Historic Preservation Act. In the meantime, if you have any questions, please do not hesitate to contact me at (919) 807-6553 or at dolores.hall@ncdcr.gov.

Sincerely,

Dolores A. Hall
Deputy State Archaeologist – Land
Office of State Archaeology
