

June 19, 2009

Mr. Stephen Cowne, Director
Quality and Regulatory Affairs
Louisiana Energy Services
P.O. Box 1789
Eunice, NM 88231

SUBJECT: APPROVAL OF LOUISIANA ENERGY SERVICES REQUEST FOR
WITHHOLDING INFORMATION FROM PUBLIC DISCLOSURE (LOUISIANA
ENERGY SERVICES GAS CENTRIFUGE URANIUM ENRICHMENT FACILITY)

Dear Mr. Cowne:

On June 11, 2009, Mr. Gregory Smith transmitted an affidavit signed by Mr. Smith requesting that information in Enclosure 2 to the June 11, 2009, letter pertaining to a design description of the assay sampling rig for the Louisiana Energy Services (LES) gas centrifuge uranium enrichment plant in Lea County, New Mexico, be withheld from public disclosure under the provisions of Title 10 *Code of Federal Regulations* (10 CFR) Section 2.390. Mr. Smith also provided a non-proprietary version of the document.

In the affidavit, Mr. Smith requested that Enclosure 2 of the June 11, 2009, letter be withheld because the information is proprietary information related to core equipment commercial aspects of the LES facility and is information that is typically and consistently held in confidence by LES. Mr. Smith stated that no public disclosure has been previously made and it is not available from public sources. In addition, public disclosure of the information has the potential to result in substantial harm to the competitive position of LES and could reduce or foreclose the availability of profit opportunities if it is disclosed. Mr. Smith also stated that the information is considered to be Export Controlled Information. Without withholding Export Controlled Information, public disclosure would make it available to persons and countries prohibited from receiving such information.

We reviewed the justification that Mr. Smith provided in accordance with the requirements of 10 CFR 2.390 and, on the basis of Mr. Smith's statements, have determined that the information sought to be withheld contains proprietary commercial information and Export Controlled Information and should be withheld from public disclosure.

Withholding information from public inspection shall not affect the right, if any, of persons properly and directly concerned to inspect the documents. If the need arises, we may send copies of this information to our consultants working in this area. We will, of course, ensure that the consultants have signed the appropriate agreements for handling proprietary information.

If the basis for withholding this information from public inspection should change in the future such that the information could then be made available for public inspection, you should promptly notify the U.S. Nuclear Regulatory Commission (NRC). You should also understand that NRC may have cause to review this determination in the future, for example, if the scope of

a Freedom of Information Act request includes your information. In all review situations, if the NRC makes a determination adverse to the above, you will be notified in advance of any public disclosure.

In accordance with Title 10 Code of Federal Regulations 2.390 of the NRC's "Rule of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of the NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the NRC web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

If you have any questions, please contact me at 301-492-3137 or email me at Brian.Smith@nrc.gov.

Sincerely,

/RA/

Brian W. Smith, Chief
