

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

July 1, 2009

Mr. Preston D. Swafford
Chief Nuclear Officer and
Executive Vice President
Tennessee Valley Authority
3A Lookout Place
1101 Market Street
Chattanooga, TN 37402-2801

SUBJECT: BROWNS FERRY NUCLEAR PLANT UNIT 2 – WITHDRAWAL OF RELIEF
REQUEST (2-ISI-22) FOR REPAIR OF CLASSES 1, 2, AND 3 AUSTENITIC
STAINLESS STEEL PIPING (TAC NO. ME1320)

Dear Mr. Swafford:

By letter dated May 18, 2009, the Tennessee Valley Authority, the licensee submitted a relief request (RR) for Browns Ferry Nuclear Power Plant, Unit 2 to the U.S. Nuclear Regulatory Commission (NRC). The proposed RR was to utilize a system leakage test in accordance with IWA-5000 in lieu of the hydrostatic test required by Code Case N-504-3.

By letter dated May 21, 2009, the licensee requested to withdraw RR 2-ISI-22 application from NRC review (Agencywide Document Access and Management System Accession No. ML091470283) due to the fact that the flaw did not penetrate the pressure boundary during welding operations. We acknowledge your request to withdraw the application. As a result, NRC staff activities on the review have ceased and the associated Technical Assignment Control Number (No. ME1320) has been closed.

If you have any questions, please contact me at 301-415-2315.

Sincerely,

/RA/

Eva A. Brown, Senior Project Manager
Plant Licensing Branch II-2
Division of Operating Reactor Licensing
Office of Nuclear Reactor Regulation

Docket No.: 50-260
