Re: Proposed agreement between the Nuclear Regulatory Commission and the State of New Jersey.

Dear Mr. Lesar:

I am a resident of the Borough of Newfield, and actively worked for many years with the NRC, NJDEP, Federal and State representatives, to have Shieldalloy Metallurgical Corporation's radioactive waste moved to an off-site licensed waste disposal facility.

The Decommissioning process has gone on to long; it is time for a resolution to this situation.

I know the State's position on this matter, I believe their regulatory program will protect the health and welfare of the residents of the Borough of Newfield and surrounding communities, by enforcing a complete cleanup of the radioactive waste, off-site, at a licensed waste facility.

I support the proposed agreement for the Nuclear Regulatory Commission to relinquish regulatory authority to regulate by-product, source, and special radioactive materials to the State of New Jersey.

Sincerely,

Loretta Williams
