Trijicon, Inc.
ATTN: Darin W. Schick
Engineering Manager
49385 Shafer Avenue
P. O. Box 930059
Wixom, MI 48393

Dear Mr. Schick:

Enclosed please find Amendment No. 10 to NRC License No. 21-19874-02E and revised Registration Certificate No. NR-0418-D-101-E to include the Model RMR Series scope. While your October 1, 2008, letter also indicated you wished to make a designation change to separate the Trijicon Reflex from the ACOG line, it was not clear to us exactly what changes to the license and registration you were requesting, nor what previously submitted correspondence and device descriptions etc., might be affected as a result of this change. Therefore, rather than delay authorizing the new sight Model, we have not taken action on this portion of your request. If you wish to pursue this change, you should resubmit the request as a separate action and provide complete and clear information describing the needed changes,

Please note that as was mentioned in our letter dated May 14, 2003, certain devices listed on the registration certificate are not included or authorized for distribution on your license. Again, as previously stated, you may wish to consider amending the registration sheet so that it accurately reflects your license and the devices you are currently authorized to distribute.

Please review the enclosed documents carefully and be sure that you understand all the conditions. If there are any errors or questions, please contact us so that appropriate corrections and answers can be provided.

Please be advised that you must manufacture and distribute the product in accordance with the statements and representations contained in your application, with enclosures thereto, and the information set out in your registration certificate. As a general rule, you must request and obtain an amendment to the certificate before you make changes or modifications to the information submitted to obtain the certificate. You are also obligated to notify us promptly in writing should you decide to no longer manufacture or offer service support for the product.

Please be advised that you must conduct your program involving radioactive materials in accordance with the conditions specified in your NRC license, representations made in your license application, and other rules, regulations, and orders of the U.S. Nuclear Regulatory Commission, now or hereafter in effect, to include the following:

1. Comply with applicable NRC regulations in 10 CFR Part 30, "Rules of General Applicability to Domestic Licensing of Byproduct Material"; 10 CFR Part 32, "Specific Domestic Licenses to Manufacture or Transfer Certain Items Containing Byproduct Material"; and other applicable regulations.

NOTE: Licensees authorized to distribute or initially transfer products containing byproduct material must also possess a valid possession license issued either by NRC or an Agreement State(s) which authorizes possession and use of byproduct material

2. Distribute only those products containing radioactive material which are specifically authorized in your license.
3. Notify NRC in writing within 30 days of any change in mailing address.
4. Request and obtain appropriate amendments if you plan to change control or ownership of your organization, change locations of distribution of products containing radioactive material, or make any other changes in your program which are contrary to the license conditions or representations made in your license application and any supplemental correspondence with NRC.
5. Submit a complete renewal application or termination request at least 30 days before the expiration date on your license. You should receive a reminder notice approximately 90 days before the expiration date. Continued distribution of products containing radioactive material after your license expires is a violation of NRC regulations.
6. In accordance with 10 CFR 30.36, request termination of your license if you plan to permanently discontinue activities involving distribution of products containing radioactive material.

You will be periodically inspected by NRC. Failure to conduct your program in compliance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC may result in enforcement action(s) against you. This could include issuance of a notice of violation; proposed imposition of a civil penalty; or an order suspending, modifying, or revoking your license as specified in the "General Statement of Policy and Procedures for NRC Enforcement Actions," (NUREG-1600).
