**SUPPLEMENTARY INFORMATION:**

**I. Introduction**

The U.S. Nuclear Regulatory Commission (NRC or Commission) is issuing a new guide in the agency's "Regulatory Guide" series. This series was developed to describe and make available to the public information such as methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

RG 5.75, "Training and Qualification of Security Personnel at Nuclear Power Plants," was issued with a temporary identification as Draft Regulatory Guide, DG-5015. This regulatory guide applies to operating power reactors licensed in accordance with Title 10 of the *Code of Federal Regulations* Part 50, "Domestic Licensing of Production and Utilization Facilities" (10 CFR Part 50), and with 10 CFR Part 52, "Licenses, Certifications, and Approvals for Nuclear Power Plants." New applicants should consider this guidance in preparing an application for a combined license under 10 CFR Part 52.

## II. Further Information
