Rich,

John and I just spent some time going through the draft OC inspection report. One of the comments I made during our discussion was how helpful it was having the attached drawings in front of me as I read through each observation regarding the monitoring of drywell cavity seal leakage. I really think the "reader" would benefit from our inclusion of drawings showing the general arrangement of the two leakage monitoring arrangements discussed in the inspection report. Including them is a simple matter of creating a .pdf version of the appropriate drawing (or portion of a drawing) then pasting them into the report.

Thoughts?
