Subject: Docket # PRM 72-6 (Reduce Vulnerability of Stored Nuclear Waste)

DOCKETED
USNRC

May 14, 2009

June 18, 2009 (2:29pm)

Nuclear Regulatory Commissioners

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Dear Commissioners,

I am writing to encourage the NRC to take steps to increase the security and safety of nuclear waste stored at civilian nuclear reactor sites, which remains unacceptably vulnerable to a terrorist attack or accident. If there was a way to launch all of our nuclear waste into the sun,

that would be the ideal way to dispose of it, as once it got within the orbit of Mercury, it would be vaporized and mixed in with the solar wind. The quantity of radioactive materials we would add to the mix would be negligible compared to what that nuclear blast furnace produces. Keeping our radioactive waste on the planet will only tempt munitions manufacturers to make more depleted uranium ammunition, a method we distribute our waste all over the world.

Sincerely,

Mr. Dave Kisor
