Subject: Docket # PRM 72-6 (Reduce Vulnerability of Stored Nuclear Waste)

DOCKETED
USNRC

May 15, 2009

June 18, 2009 (2:29pm)

Nuclear Regulatory Commissioners

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Dear Commissioners,

I am writing to encourage the NRC to take steps to increase the security and safety of nuclear waste stored at civilian nuclear reactor sites, which remains unacceptably vulnerable to a terrorist attack or accident. Thank you for reconsidering the request for states to be able to implement clean car standards for global warming pollution. I urge you to please grant states the right to implement these breakthrough regulations as soon as possible.

This is your opportunity to reduce automobile global warming pollution, provide consumers like me with more fuel-efficient vehicle choices, and

help transform the auto industry into a key component of a clean energy economy. State governments across the country are working to reduce global warming pollution. For many of these states, the clean car standards are a central component of their plans. The science is clear and it's urgent: to prevent the worst effects of global warming, state and national policies must work in tandem to put the brakes on climate change.

Sincerely,

Mr. Robert Wagner
