LICENSEE:
 The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

- 1. Based on the inspection findings, no violations were identified.
- 2. Previous violation(s) closed.
- 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, NUREG-1600, to exercise discretion, were satisfied.

_____ Non-Cited Violation(s) was/were discussed involving the following requirement(s) and Corrective Action(s):

4. During this inspection certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.
 (Violations and Corrective Actions)

Licensee's Statement of Corrective Actions for Item 4, above.

I hereby state that, within 30 days, the actions described by me to the inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

Temporary Job Site Inspection

PROGRAM SCOPE

The licensee is a manufacturer of plastic film products that employs 25 individuals. The licensee possesses one specifically licensed fixed gauge used in the production of plastic film products. Currently, one individual is involved with the use and oversight of the gauge. The gauge inventory and shutter checks are performed at required frequencies.

The licensee is authorized to remove and/or relocate the gauge, however, according to the RSO, the gauge is relocated, removed by the manufacturer. The licensee does not perform any services or maintenance activities on the gauge.

Performance Observations

The inspector toured the facility and the gauge was observed in conjunction with the licensee's current inventory. Proper lock-out/tag-out procedures were also described. Interviews conducted with plant workers revealed that under no circumstances would a vessel be entered without the RSO supervision of the procedures.
