**PROGRAM SCOPE**

This was an initial inspection. The licensee is a small engineering firm. At the time of this inspection the licensee possessed no Troxler moisture density gauges. The licensee had received an NRC License to possess moisture density gauges based on a contract to conduct work which did not materialize. The licensee had planned on renting these gauges if the contract was accepted. The licensee is still considering retaining this license in hopes of possibly obtaining other work in the future. The inspector stated that the licensee would be inspected annually until the licensee chose to terminate their license or obtain gauges.

**Performance Observations**

The licensee has no radioactive materials at this time.
