

# Counterfeit, Suspect, Fraudulent Items (CSFI): Yesterday, Today & Tomorrow - Introduction

***Nuclear Procurement Issues Committee (NUPIC) Vendor Meeting  
June 17, 2009 St. Louis, MO***

## **Daniel Pasquale**

Sr. Operations Engineer  
Quality and Vendor Branch  
Office of New Reactors

## A MESSAGE FROM FORMER NRC CHAIRMAN KLEIN

*“It is a matter of great concern when supposedly high quality machine components are substandard or counterfeit, particularly when such defective or fraudulent parts could find their way into a commercial nuclear reactor. That has not happened. And I am confident that it will not happen, as long as we remember that at the end of the day, nuclear power plants are really in the safety business.”*

- **NRC Commissioner and Former Chairman Dale E. Klein, at the ANS Utility Working Conference, Amelia Island, FL - August 6, 2007**

# TOPICS

- **National:** U.S. DOC – Survey results from D.O.D. contractors
- **Regulator:** U.S. NRC
- **Industry:** EPRI & NUPIC
- **Suppliers:** Eaton Cutler Hammer, Square-D/Schneider Electric

## DISCUSSION GOALS

- What should you be doing?
- What can you be doing?
- What is the NRC doing?
- What are some other suppliers doing?
- What are some other industries doing?

## It Takes a Community...

- To share CSFI information
- To create an environment of intolerance
- To set in place the most effective anti-counterfeiting culture
- To respond swiftly to identified CSFI events
- To eradicate the industry of those who would trade public health and safety for personal profit

## FROM PIECE PARTS TO POWER PLANTS - SHARE CSFI INFORMATION

*“Whether it involves major components, smaller parts, nuclear plant designs, or the actual construction and operation of power plants, we all have an interest in encouraging high levels of safety, and strong safeguards in every country that participates in the fuel cycle.”*

**- Former NRC Chairman Dale E. Klein at the Women in Nuclear Conference - Anaheim, CA, July 16, 2007**
