Subject: unanticipated discoveries language

Here it is! This is an example of the standard language that we use in our MOA documents. Let me know if you have any questions --

Unanticipated Discoveries

In the event of any unanticipated discoveries of potential historic properties during construction, HODPW will ensure that the MD SHPO and the Corps are notified within 48 hours after the discovery, and all construction involving subsurface disturbance will immediately be halted in the area of the discovered resource and in the area immediately surrounding the resource where further subsurface deposits may reasonably be expected to occur. HODPW and the MD SHPO, or an archeologist approved by the MD SHPO, will inspect the work site without unreasonable delay and determine the parameters of the affected archeological site. Construction work may then continue in the project area outside those parameters. Within fifteen (15) working days of first notifying the Corps and MD SHPO, HODPW, in consultation with the MD SHPO and the Corps, will assess the National Register eligibility of the resource. If the resource is assessed as possessing those qualities of significance identified in the National Register criteria, HODPW will ensure that the appropriate avoidance, protection, and treatment measures are implemented pursuant to the terms of this Memorandum of Agreement (MOA).
