**LEVY COUNTY NUCLEAR POWER PLANT, UNITS 1 AND 2  
DOCKET NOS. 52-029 AND 52-030  
SUPPLEMENTAL INFORMATION FOR ENVIRONMENTAL AUDIT –  
CALCULATION NATIVE FILES**

Reference: Letter from Garry D. Miller (PEF) to the U. S. Nuclear Regulatory Commission dated June 12, 2009, "Supplement 1 to Response to Request for Additional Information Regarding the Environmental Review", Serial NPD-NRC-2009-107.

Ladies and Gentlemen:

Progress Energy Florida, Inc. (PEF) hereby submits additional information that was requested during a conference call on April 29, 2009 and as noted in the response to RAI # 2.7.5-1 in the referenced letter. The information requested was the PAVAN input and output files based on the 2-year dataset of meteorological information compiled for the Levy County Nuclear Power Plant (LNP) site.

The supplemental information contained in the files on the attached CD is provided to support the NRC's review of the LNP Environmental Report (ER) but does not comply with the requirements for electronic submission. The NRC staff requested the files be submitted in their native formats, required for utilization in the software employed to support the ER development. PEF understands that converting the information to PDF output files would not serve the underlying purpose of the submittal; i.e., to provide the raw, unprocessed data to enable reviewers to evaluate software used in the LNP application.

The attached CD contains the following files:

- PAVAN\_levy2yrIN.dat
- PAVAN\_levy2yrOUT

If you have any further questions, or need additional information, please contact Bob Kitchen at (919) 546-6992, or me at (919) 546-6107.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on June 23, 2009.

Sincerely,

Garry D. Miller  
General Manager  
Nuclear Plant Development
