Dr. Colurso,

Most NRC documents and correspondence are publicly available. In 1999, the NRC began the use of the ADAMS system for making documents available from our public website. Here is the link:

<http://www.nrc.gov/reading-rm/adams.html>

This allows anyone to review publicly-available documents and correspondence. Under our current policy, most documents are uploaded into ADAMS within a few days of issuance.

I was unaware that service provider organizations were using ADAMS to locate clients. Please note that any contact you may have as a result of my email to you is not a recommendation or endorsement of a particular company by the NRC, but is an independent solicitation by the company. The NRC does not act as a consultant or recommend consultant services to our licensees.

If you have any questions about this email, or my prior email, I would be happy to discuss them with you. I will be in the office Friday, 6/26 but will be out of the office for inspection June 29 through July 2. I will be in the office during the week of July 8.

Betsy

Seb,

Thanks for the information. Our radiation safety program is very small, with no extra funds for an outside consultant.

How exactly were you able to access an email sent to me from the NRC? It seems that some level of privacy has been breached.

Good morning Dr. Colurso,
While I was reviewing the NRC website I came across an e-mail sent to you on June 3rd from Betsy Ullrich at the NRC regarding additional information required associated with your amendment request.

In the event you may need assistance, I would to introduce you to Chase Environmental Group and offer you our services. Chase is a full service decontamination, decommissioning, remediation, licensing and waste management firm providing high-quality, practical, cost-effective solutions to your environmental challenges. We are committed to providing you with the highest quality, cost-effective services to meet your radiological needs.

Thank you for time and feel free to contact me if I can assist you in any way.

Regards,
Seb Cannata
