Subject: Quality Assurance Program Certificate for Radioactive Material Packages,
Certificate Number 71-0926

The referenced approval certificate was issued June 10, 2004 with an expiration date of June 9, 2009. NASA has completed all planned radioactive material shipments that would require use of an NRC Licensed container. Therefore, we have no further need for the NRC approved QA Plan and do not intend to apply for renewal of the certificate.

Should you have any questions or need additional information, please contact me at NASA Plum Brook Station, 6100 Columbus Avenue, Sandusky, Ohio 44870, or by telephone at (419) 621-3277.

Sincerely,

A handwritten signature in black ink, appearing to read "Keith M. Peacock". The signature is fluid and cursive, with a long horizontal stroke at the end.

Keith M. Peacock
NASA Decommissioning Program Manager
