Subject: Notification of Completion – NIST Plutonium Clean-up

Dear Mr Whitten:

EnergySolutions, LLC is providing this letter as official notification that we have completed onsite licensed activities at the NIST facility located in Boulder, CO as of April 16th, 2009 in association with the plutonium source clean-up. All remaining radioactive waste was been shipped off site on April 13th and verbal notification made to the NRC of our completion during the exit interview with Mr. Bob Evans on April 16th following the confirmatory surveys as performed by ORISE. The Final Survey Report documenting the project activities performed as well as the as left condition of the facility was issued to NIST on May 27th. All surveys as documented in the report demonstrate that no residual activity remained in excess of the approved release criteria.

If you have any questions or require additional information please contact me at (865) 425-4587 or email me at mcarr@energysolutions.com or Robin Shult, EnergySolutions Project Manager, at (865) 425-4565 or via email at rshult@energysolutions.com.

Regards,

Michael A. Carr, CHP
