Subject: RE: Church Rock Issues List

Roy,

There has been no change in NRC's intention. As you may recall in preparation of the May 2009 site visit/Interagency meetings, the NRC requested that GE/UNC present some of their concerns/issues which could be incorporated as part of the inter-agency government meeting discussion, since as the Licensee, you were not allowed to participate in this meeting being hosted by the NRC.

Just as a reminder the issues list was submitted to the NRC after the May 5-6, 2009 - Interagency Meeting/Site Visit, thus we could not include UNC/GE's concerns as part of our government meeting discussions.

Please note that the Church Rock Issues List, will be considered during the regulatory technical review/discussion as we move forward on the technical evaluation of the SWFSS, which as you are aware will include the submittal of Part 2 (to be submitted July 2009) and Part 3 (to be submitted by 12/2010). This approach will of course translate into more productive technical working sessions (i.e. meetings, tele-conference calls) amongst GE/UNC and regulatory entities, given the complexities of site-wide cleanup and off-site migration of constituents.

Hopefully this helps in clarifying the usefulness of the Church Rock Issues list. In the interim please feel free to contact me if you have any more questions.

Yolande,

When we were asked to prepare the list by NRC, UNC was told that NRC intended to convene sessions to deal with the issues one-by-one. This appears to be a change in NRC's intention to convene the working sessions to tackle the issues one-by-one.

If this is to be deferred to the end of the SWSFS process, then UNC is not clear about your reason for asking us to prepare it in advance of the SWSFS?

Roy

Roy,

The issues list will be considered as part of the inter-government agency review of the upcoming Supplemental Site Wide Feasibility Study Report for the UNC Church Rock site and of course the other tangible issues concerning co-disposal of Northeast Church Rock Mine waste. During the review process, it is anticipated that UNC/GE as the licensee will be engaged in technical discussions at which time the issues list will be further discussed.

Yolande,

Just checking in to see what progress you have made with respect to UNC's May 20th transmittal of the site issues list, and what if anything, we may do to help you.
