ADAMSAccessionNumber: ML091810159

Good morning John,

I see that Entergy/Indian Point 3 is running at full power so the feedwater system must have been fixed. Please withdraw my 2.206 request letter dated June 17, 2009 that I sent to the Executive Director for Operations. It is the one in which I had made two requests: the first to shut down one or both plants if certain conditions were met, and the second for the NRC to stop Indian Point license renewal efforts based on equipment maintenance concerns.

Thank you,

Tom Gurdziel
