

EXPLANATION

13	6	1	4
7	5		6
1		2	2
2	9	5	1

The black outlines shown on the geologic map represents USGS 7.5 minute topographic quadrangles which were used for all site reconnaissance work. The number of evaluated locations per quadrangle is shown in the circle. Any quadrangle containing a SIL site is outlined in heavy bold lines.

This plate was constructed from the following two USGS geologic maps:

- 1) Johnson and Peebles, 1986, Quaternary Geology, Hatteras 4° x 6° Quad., U.S., 1:1,000,000, Map I-1420 (NI-18).
- 2) Colquhoun and Others, 1987, Quaternary Geology, Savannah 4° x 6° Quad., U.S., 1:1,000,000, Map I-1420 (NI-17)
