Subject: Comments on Docket No. 70-7015

Dear NRC Staff,

My name is Linda Milam. I have lived in Idaho Falls, Bonneville County, Idaho for nearly 33 years. During that time, I have been involved in many volunteer activities including serving as president of the League of Women Voters, Chamber of Commerce, and hospital board. For nearly a decade I was employed at the Idaho National Laboratory, working at the Technical Library and with the Buried Waste Technology Development group.

During 1992 - 93, I was an elected member of the Idaho Falls City Council and was then elected Mayor, a position I held for three terms, from 1993 till early 2006. During that time I served six years on the INL Citizens' Advisory Board. I continue to be involved in many volunteer activities as a retired person, including supporting science and technology research and development that is in the public interest.

Our country is confronting important decisions related to energy production and global warming issues. I believe that a uranium enrichment facility is needed for the continued and even increased production of nuclear energy. Importing this needed material makes no more sense than continuing our dependency of imported oil. Of course, all the potential impacts, whether environmental, social, or financial, should be fully vetted and I join others in encouraging a full and complete environmental review. Having said that, of course the review should be completed in a timely manner, so that we can continue to address our country's energy needs.

Sincerely,

Linda Milam
