SUBJECT: TERMINATION OF YOUR NRC RADIOACTIVE MATERIALS LICENSE

Dear Mr. Mitchell:

In the NRC FORM 314, Certificate of Disposition of Materials, dated March 30, 2009, you requested that we terminate your NRC radioactive material license, License Number 21-26292-01 (expiration date of October 31, 2011). The subject license authorized use/storage of a portable moisture/density gauge at your facilities located at 4961 Garfield Road South, Kingsley, Michigan, as well as at temporary job sites. The NRC staff has reviewed the information provided in that Certificate of Disposition, and the facsimile dated June 19, 2009, and we have concluded that no leaking sealed source were ever possessed by you, based on routine leak test data (copies of the most recent data provided with the termination request). Further we conclude, based on the information provided, that all licensable radioactive material has been removed from your facility and transferred to and received by another licensee possessing a license authorizing the possession and use of the make and model of gauge transferred to them by you.

Based on these conclusions, no further remediation or actions with respect to NRC regulated material is required for License Number 21-26292-01 and your facilities located at 4961 Garfield Road South, Kingsley, Michigan, meet NRC criteria for release for an restricted use and termination of NRC License Number 21-26292-01. Accordingly, an amendment is enclosed, terminating your NRC License Number 21-26292-01, as requested.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

W. P. Mitchell
